

## + Summary

Passionate engineer with an emphasis on testing and clean, concise, idiomatic code. Self-starter on a path of constant growth, while consistently striving to work with my fellow peers to create easily digestible code and make a meaningful impact.

## + Projects

### Slice, Formerly MyPizza (slicelife.com)

- Built features following TDD methodologies
- Improved spec runtime, overall test coverage and readability
- Implemented a home-grown fraud detection system
- Implement CodeClimate with Rubocop to introduce sane coding standards
- Pair programmed
- Code review through GitHub
- Improved twilio and fax integrations
- Removed n+1 queries

### Secret Santa (secret-santa-site.herokuapp.com)

- Rails web application allowing friends to play Secret Santa
- Created all models and database structures to store each transaction
- Added Rails Action-Mailer for delivery of email
- Implemented function to randomize list of friends, and create 1:1 relationships
- Added validations to models to prevent invalid form submission

### Wells Fargo Tablet Locator (www.wellsfargo.com/locator)

- Enhanced application speed by reducing extraneous ajax calls
- Updated Interceptor's device detection to provide specific view to tablet devices
- Created new tablet-specific view to enhance user experience
- Integrated java back-end logic into new Jsp tablet views
- Set up an internationalization framework to add more language capabilities
- Implemented a spanish translation

### Milestone Properties (www.sfsuswe.com/~f14g02)

- Engineered a web-based real estate application using the LAMP Stack
- Gathered requirements/specifications and designed the SQL Database
- Created test use cases and QA test plans
- Created the user interface
- Drove system architecture decisions along with initial concept-design until the product's release
- Integrated Walk-Score API to rank locations based on locational factors
- Maintained 50+ page documentation for entire system
